**Technical surface modification of commercial photovoltaic module covers
gives aesthetic weather proof cover over part of active surface**

HERMANNSDOERFER I 2002.09.20 2002DE-2014872

(2003.02.13) H01L 31/048, H01L 31/0232

Addnl. Data: SCHNEIDER I F

(SCHN/)

Novelty: A photovoltaic module transparent cover is impressed with a monochrome or colored weather-proof pixilated pattern up to a maximum of 20% of the total active surface.

Detailed Description: INDEPENDENT CLAIMS are also included for a module as above in which a second layer of glass or plastic is added or in which a pattern is formed by etching, etc.

Use: As photovoltaic modules (claimed).

Advantage: Aesthetic appearance is improved for incorporation into buildings, windows, etc. Modifications are inexpensive. (4pp)
